CIRCULAR.

We take pleasure in presenting the Trade with our Illustrated and Descriptive Catalogue of Cabinet and Trunk Hardware.

In the preparation of the work we have studied to so simplify the classification of the goods as to better enable the Trade, with the assistance of our new system of numbering, to make selection without the annoyance that has been prominent in the past.

We call special attention to our Solid Nickel Bit Keyed Locks, and Fancy Bronze Trunk Locks. We present also a new line of patented Trunk Locks, combining a Trunk Lock and Catch, which for strength, durability and workmanship cannot be equaled.

Our facilities are such that we are prepared to furnish all goods in this line with promptness, assuring our friends that we shall always strive to have *quality* and *finish* far superior to anything of the kind in the market.

We are constantly adding to our line of Cabinet and Trunk Locks, and will issue illustrated sheets as fast as completed.

Respectfully,

CORBIN CABINET LOCK CO.

CORBIN CABINET LOCK CO.

NEW BRITAIN, CONN., April 1st, 1884.

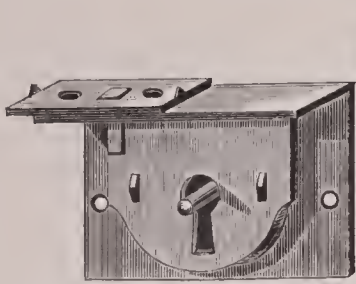

We use Numbers ranging from No. 1 to No. 899 for Iron Cabinet Locks, and the same Numbers with a (0) cipher prefixed for Brass Cabinet Locks. We thereby save a great many Numbers and make those used more easily comprehended. In packing we label Iron Locks with a Green label, Brass Locks with a Yellow label, and Locks 24 Keyed with a Red label. Each label bears a large Corbin Number, also an Eagle and Gaylord corresponding Number for purposes of distinction and comparison.

Locks are Classified and Numbered in the following manner:

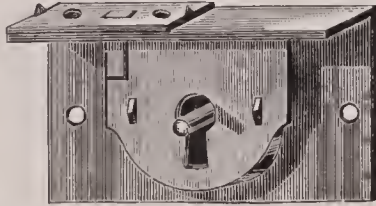

CHEST LOCKS, - -	{	Iron, from No. 1	to No. 199.
	{	Brass, " No. 01	" No. 0199.
